PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with 200+ documented infrastructure implementations across AWS, Azure, and Kubernetes. Proven ability to design, automate, and harden production-style environments spanning CI/CD pipelines, container orchestration, IaC, and multi-cloud architecture. Former AWS Cloud Instructor with hands-on teaching experience. Holds AWS CCP, AZ-900, and Google IT Support certifications; currently pursuing AZ-104 and AWS SAA-C03.

TECHNICAL SKILLS

Cloud	AWS (EC2, S3, IAM, VPC, Lambda, ECS, EKS, RDS, DynamoDB, SQS, SNS, CloudFormation, CloudWatch, KMS, ECR, ALB, Auto Scaling) Azure (VMs, VNETs, AKS, ACR, Blob Storage, Azure SQL, Event Hubs, Key Vault, Application Gateway, ARM Templates)
DevOps & CI/CD	Jenkins (multistage pipelines, RBAC, parameterized builds) Docker & Docker Compose Ansible (10+ modules, Jinja2) Terraform CloudFormation ARM Templates Git & GitHub
Orchestration	Kubernetes: k3s, EKS, AKS: rolling updates, rollbacks, PersistentVolumes, Secrets, RBAC, sidecar/init containers, resource limits, QoS classes
Operating Systems	Linux (RHEL, Ubuntu): SELinux, IPTables, SSH hardening, LAMP/Nginx, cron automation Windows Server: Active Directory, Group Policy, WSUS, NTFS, backup/recovery
Networking	TCP/IP, DNS, DHCP, subnetting, VPC/VNet design, NAT, VPN, load balancing (ALB, Application Gateway, Nginx), VNet peering, NSGs, Security Groups
Security & IAM	AWS IAM, Azure RBAC, KMS, Key Vault, SELinux, IPTables, SSL/TLS, SSH key management, least-privilege design, zero-trust principles
Monitoring	AWS CloudWatch, Zabbix, PRTG, Wazuh, Grafana: threshold alerting, dashboard design, centralized log ingestion
Scripting	Bash, PowerShell, Python (boto3, Azure SDK) AWS CLI, Azure CLI Jinja2
Databases	PostgreSQL, MariaDB, MySQL, Amazon RDS, DynamoDB, Azure SQL

PROFESSIONAL EXPERIENCE

IT Support Specialist • Bee Tee Haulage and Logistics

Lagos, Nigeria (Remote)

Sep 2024 – Oct 2025

- Delivered Tier 1/2 technical support to 50+ users across Windows, M365, and networking, achieving a 95% first-call resolution rate and measurably reducing unplanned downtime.
- Optimized ticket triage and resolution workflows, reaching 95% SLA compliance and cutting average response times by 30%, increasing user satisfaction scores by 15%.
- Administered Microsoft 365 identities (user provisioning, licensing, MFA) via M365 Admin Center, improving provisioning turnaround by 25%.
- Standardized file-sharing and access-control protocols, reducing access-related incidents by 35%.
- Built and maintained 50+ technical SOPs and troubleshooting guides, boosting team resolution efficiency by 40% and enabling faster onboarding.

AWS Cloud Instructor • Skill Mountain Academy

Nigeria

Dec 2021 – Jul 2024

- Designed and delivered structured AWS curriculum preparing learners for the AWS Certified Cloud Practitioner exam, covering EC2, S3, IAM, VPC, RDS, Lambda, and CloudFront with emphasis on real-world architecture patterns.

- Built hands-on labs simulating AWS deployment scenarios, improving student exam readiness and practical cloud fluency across multiple cohorts.
- Translated complex cloud concepts (shared responsibility, IAM least-privilege, billing) into accessible learning frameworks for non-technical audiences.

ENGINEERING PORTFOLIO

Flagship: Production-Style Multi-Cloud CI/CD Platform

- Terraform-provisioned AWS infrastructure (VPC, EKS, IAM, DynamoDB, CloudWatch) deployed from code with zero manual console configuration.
- Jenkins multistage CI/CD pipeline with parameterized builds, distributed agents, RBAC, and automated rollback on failed health checks.
- Dockerized microservices orchestrated on EKS with rolling update strategy, PersistentVolumes, Secrets management, and QoS class enforcement.
- Centralized monitoring via CloudWatch + Grafana with threshold alerting and log ingestion from cross-VPC sources.
- IAM least-privilege security model with KMS encryption at rest, SSL/TLS in transit, and zero-trust network segmentation across VPCs.

Cloud & DevOps Engineering Projects | github.com/arinze-edeh/cloud-infrastructure-devops-labs

200+ documented implementations, each covering problem, solution, implementation, validation, errors/resolutions, and lessons learned.

- AWS (20+ services): EC2, EBS, S3 versioning/lifecycle, IAM, Lambda, ECS Fargate, EKS, RDS, DynamoDB, SQS/SNS priority queuing, CloudWatch alerting, cross-VPC log ingestion pipeline, CloudFormation IaC, ENI and security group automation.
- Azure (20+ services): VNet provisioning/peering, passwordless SSH on Linux VMs, managed disk attachment, Blob storage lifecycle, Azure SQL, ACR/AKS, Event Hubs log pipeline (Python SDK), Application Gateway, Key Vault, ARM Templates.
- Kubernetes: Rolling updates/rollbacks, multi-container pods (emptyDir), sidecar log-shipping (Nginx+Ubuntu), PHP-FPM sidecar repair, resource limits/QoS, environment variable injection, fault diagnosis on k3s clusters.
- CI/CD & IaC: Jenkins multistage declarative pipelines (distributed agents, RBAC, conditional logic, parameterized builds). Ansible idempotent playbooks across 10+ modules with Jinja2. Terraform-provisioned AWS infrastructure (VPC, EC2, IAM, DynamoDB, CloudWatch).
- Docker: Dockerfile optimization and fault diagnosis, multi-service Docker Compose stacks (LAMP, Nginx, PHP-FPM), custom bridge networking, multi-host container provisioning.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CCP) | Amazon
Web Services, 2021

Google IT Support Professional Certificate |
Google/Coursera, 2025

Microsoft Azure Fundamentals (AZ-900) |
Microsoft, 2021

In Progress: AZ-104 (Azure Administrator) | AWS SAA-C03

TRAINING & SIMULATIONS

Service Desk Analyst Simulation | Datacom via
Forage, Jan 2026
ITIL-aligned incident lifecycle management: logging, categorization, escalation, SLA-bound resolution, and post-incident documentation.

Cloud Platform Engineering Simulation | Verizon
via Forage, Jan 2026
Architected cloud-native VPN product incorporating multi-region redundancy, automated failover, least-privilege IAM, and zero-trust network segmentation.

EDUCATION

B.Sc. Computer Science | University of the People, California, USA
(Online)
CGPA: 4.0 / 4.0 | Expected Dec 2026

Expected Dec 2026

ADDITIONAL

Available to work asynchronously across US, UK, CAN, and EU time zones. Open to remote-first, hybrid, and relocation engagements globally. All portfolio implementations are publicly documented to enterprise standard.
