

ARINZE JONATHAN EDEH

Cloud & DevOps Engineer | Platform & Infrastructure Engineering | Systems Administration

+234-90-3342-1037 | edeharinze389@gmail.com | [linkedin.com/in/arinze-edeh](https://www.linkedin.com/in/arinze-edeh) | github.com/arinze-edeh | Open to Remote & Relocation

PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with 200+ documented infrastructure implementations across AWS, Azure, and Kubernetes, available for remote-first and relocation roles globally. Ranked Top 10 globally on KodeKloud's Senior DevOps Engineer leaderboard among thousands of practitioners worldwide. Based in Nigeria; authorized and available for fully remote work worldwide, with openness to relocation. Proven track record designing, automating, and hardening production-grade environments spanning CI/CD pipelines, container orchestration, IaC, and multi-cloud architecture. Former AWS Cloud Instructor; holds AWS CCP, AZ-900, and Google IT Support certifications, actively completing AZ-104 and AWS SAA-C03.

TECHNICAL SKILLS

Cloud	AWS (EC2, S3, IAM, VPC, Lambda, ECS, EKS, RDS, DynamoDB, SQS, SNS, CloudFormation, CloudWatch, KMS, ECR, ALB, Auto Scaling) Azure (VMs, VNETs, AKS, ACR, Blob Storage, Azure SQL, Event Hubs, Key Vault, Application Gateway, ARM Templates)
DevOps & CI/CD	Jenkins (multistage pipelines, RBAC, parameterized builds, distributed agents) GitHub Actions Docker & Docker Compose Ansible (10+ modules, Jinja2) Terraform CloudFormation ARM Templates Git & GitHub
Orchestration	Kubernetes (k3s, EKS, AKS): rolling updates, rollbacks, PersistentVolumes, Secrets, RBAC, sidecar/init containers, resource limits, QoS classes, Helm
OS & Networking	Linux (RHEL, Ubuntu): SELinux, IPtables, SSH hardening, LAMP/Nginx, cron Windows Server: Active Directory, Group Policy, WSUS TCP/IP, DNS, DHCP, VPN, VPC/VNet, NAT, ALB, Nginx, VNet peering, NSGs
Security	AWS IAM, Azure RBAC, KMS, Key Vault, SELinux, IPtables, SSL/TLS, SSH key management, least-privilege design, zero-trust principles
Monitoring	AWS CloudWatch, Prometheus, Zabbix, PRTG, Wazuh, Grafana: threshold alerting, dashboard design, centralized log ingestion
Scripting & DBs	Bash, PowerShell, Python (boto3, Azure SDK), AWS CLI, Azure CLI, Jinja2 PostgreSQL, MariaDB, MySQL, Amazon RDS, DynamoDB, Azure SQL

PROFESSIONAL EXPERIENCE

- IT Systems & Cloud Support Specialist | Bee Tee Haulage and Logistics** | Lagos, Nigeria (Hybrid) Sep 2024 to Oct 2025
- Delivered Tier 1/2 technical support to 50+ users across Windows, Microsoft 365, and networking infrastructure, achieving a 95% first-call resolution rate and measurably reducing unplanned downtime.
 - Optimized ticket triage and resolution workflows, reaching 95% SLA compliance, cutting average response times by 30%, and increasing user satisfaction scores by 15%.
 - Administered Microsoft 365 identities including user provisioning, licensing, and MFA enforcement via M365 Admin Center, improving provisioning turnaround by 25%.
 - Managed AWS environment administration tasks covering IAM user reviews, S3 access audits, and EC2 health monitoring, contributing to a 20% reduction in cloud misconfiguration incidents.
 - Standardized file-sharing and access-control protocols, reducing access-related security incidents by 35%.
 - Authored and maintained 50+ technical SOPs and troubleshooting guides, boosting team resolution efficiency by 40% and accelerating onboarding for new hires.
- Self-Directed Cloud & DevOps Engineering Study** | Independent Nov 2025 to Present
- Completing AZ-104 and AWS SAA-C03 certification tracks while expanding hands-on infrastructure portfolio with GitHub Actions CI/CD pipelines, Helm-based Kubernetes deployments, and Prometheus/Alertmanager observability stacks.
- AWS Cloud Practitioner Instructor | Skill Mountain Academy** | Abuja, Nigeria (Hybrid) Dec 2021 to Jul 2024
- Designed and delivered structured AWS curriculum covering EC2, S3, IAM, VPC, RDS, Lambda, and CloudFront, preparing multiple cohorts for the AWS Certified Cloud Practitioner exam.
 - Built hands-on labs simulating real-world AWS deployment scenarios, improving student exam readiness and practical cloud fluency.

- Translated complex cloud concepts including shared responsibility, IAM least-privilege, and billing models into accessible frameworks for non-technical audiences.

ENGINEERING PORTFOLIO

Production-Style Multi-Cloud CI/CD Platform | github.com/arinze-edeh/cloud-infrastructure-devops-labs

- Provisioned end-to-end AWS infrastructure (VPC, EKS, IAM, DynamoDB, CloudWatch) via Terraform with zero manual console configuration; Jenkins multistage CI/CD with parameterized builds, distributed agents, RBAC, and automated rollback on failed health checks.
- Orchestrated Dockerized microservices on EKS with rolling update strategy, PersistentVolumes, Secrets management, QoS enforcement, KMS encryption at rest, SSL/TLS in transit, and zero-trust network segmentation across VPCs.
- Centralized observability via CloudWatch and Grafana with threshold alerting and log ingestion from cross-VPC sources; IAM least-privilege security model applied throughout.

Cloud & DevOps Engineering Projects | github.com/arinze-edeh/cloud-infrastructure-devops-labs

200+ documented implementations, each covering problem, solution, implementation, validation, errors/resolutions, and lessons learned.

- EC2, EBS, S3 versioning/lifecycle, IAM, Lambda, ECS Fargate, EKS, RDS, DynamoDB, SQS/SNS priority queuing, CloudWatch alerting, cross-VPC log ingestion, CloudFormation IaC, ENI and security group automation: AWS (20+ services)
- VNet provisioning/peering, passwordless SSH on Linux VMs, managed disk attachment, Blob storage lifecycle, Azure SQL, ACR/AKS, Event Hubs log pipeline (Python SDK), Application Gateway, Key Vault, ARM Templates: Azure (20+ services)
- Rolling updates/rollbacks, multi-container pods (emptyDir), sidecar log-shipping (Nginx + Ubuntu), PHP-FPM sidecar repair, resource limits/QoS classes, Helm chart deployments, environment variable injection, fault diagnosis on k3s clusters: Kubernetes
- Jenkins multistage declarative pipelines with conditional logic and parameterized builds; GitHub Actions workflows for automated build/test/deploy; Ansible idempotent playbooks across 10+ modules; Terraform-provisioned AWS infrastructure (VPC, EC2, IAM, DynamoDB, CloudWatch): CI/CD & IaC
- Dockerfile optimization and fault diagnosis; multi-service Docker Compose stacks (LAMP, Nginx, PHP-FPM); custom bridge networking; multi-host container provisioning: Docker

CERTIFICATIONS

AWS Certified Cloud Practitioner (CCP)

Amazon Web Services, 2021

Google IT Support Professional Certificate

Google / Coursera, 2025

Microsoft Azure Fundamentals (AZ-900)

Microsoft, 2021

In Progress: AZ-104 (Azure Administrator) | AWS SAA-C03

Top 10 Global Ranking Senior DevOps Engineer Leaderboard

KodeKloud, 2025 | Ranked among thousands worldwide | 100+ day GitHub contribution streak

TRAINING & SIMULATIONS

Service Desk Analyst Simulation | Datacom via Forage, Jan 2026

ITIL-aligned incident lifecycle: logging, categorization, escalation, SLA-bound resolution, and post-incident documentation.

Cloud Platform Engineering Simulation | Verizon via Forage, Jan 2026

Architected a cloud-native VPN product with multi-region redundancy, automated failover, least-privilege IAM, and zero-trust network segmentation.

EDUCATION

B.Sc. Computer Science | University of the People, California, USA (Online) | CGPA: 4.0 / 4.0

Expected Dec 2026
